Author Index

Anderson, R.W.	Reliability and durability from large heat recovery steam generators	151–168
Angelino, G.	The potential role of organic bottoming Rankine cycles in steam power stations	75–81
Aphornratana, S.	An experimental investigation of steam ejectors for applications in jet-pump refrigerators powered by low-grade heat	351–361
Arts, T.	Experimental investigation of the unsteady rotor aerodynamics of a transonic turbine stage	327–338
Artt, D.W.	Experimental performance evaluation of a 99.0 mm radial inflow nozzled turbine at larger stator–rotor throat area ratios	205–218
Azoury, P.H.	Hydraulic ram analysis: a new look at an old problem	127–141
Besant, G.B.	Small gas turbine design: a total technology educational experience	339–347
Bidini, G.	Performance analysis of a hydraulic air compressor	191–203
Bishton, J.C.	Managing risk—achieving the balance for Magnox reactors	427–434
Bohn, D.	Aerodynamic loss prediction of axial flow turbine blade rows with coolant injection	93–101
Borgwardt, R.H.	Transportation fuel from cellulosic biomass: a comparative assessment of ethanol and methanol options	399–407
Bröckerhoff, P.	Emission behaviour of a catalytic burner fuelled with mixtures of hydrogen and methanol	409–416
Brouckaert, J.F.	Experimental investigation of the unsteady rotor aerodynamics of a transonic turbine stage	327–338
Burton, J.D.	Induced flow reciprocating pumps. Part 1	363–373
Burton, J.D.	Induced flow reciprocating pumps. Part 2	375–389
Casciaro, C.	Tip-clearance-affected flow fields in a turbine blade row	309–318
Chen, X.D.	Domestic electrical space heating with heat storage	83–92
Chernobrovkin, A.	Numerical simulation and aerothermal physics of leading edge film cooling	103–118
Chung, M.K.	Optimum values of design variables versus specific speed for centrifugal pumps	219–226
Clark, N.N.	Structural design of a probe system for a high-temperature pressurized fluidized-bed combustor	227–231
Coton, F.N.	The prediction of horizontal axis wind turbine performance in yawed flow using an unsteady prescribed wake model	33–43
Court, A.W.	Small gas turbine design: a total technology education experience	339–347
Cowan, I.R.	Improving gas turbine power plant safety: the application of computational fluid dynamics to gas leaks	475–489
Cox, J.C.	The role of research in the aerodynamic design of an advanced low-pressure turbine	235–242
Datta, A.	Energy and exergy balance in a gas turbine combustor	23–32
de Champlain, A.	Prediction of wall heat transfer for a gas turbine combustor	169–180
Dennison, G.	Dust explosions at elevated pressures and their suppression	435–446
Dénos, R.	Experimental investigation of the unsteady rotor aerodynamics of a transonic turbine stage	327–338
Dick, E.	Calculation of transition in turbine cascades by conditioned Navier–Stokes equations	319–326
Doran, W.J.	Experimental performance evaluation of a 99.0 mm radial inflow nozzled turbine at larger stator–rotor throat area ratios	205–218
Eames, I.W.	An experimental investigation of steam ejectors for applications in jet-pump refrigerators powered by low-grade heat	351–361
Eames, P.C.	Asymmetric line-axis inverted absorber compound parabolic concentrator optical parameter analysis	143–148
Elder, R.L.	The nature of wakes in multistage axial flow compressors	275–289
Emonts, B.	Emission behaviour of a catalytic burner fuelled with mixtures of hydrogen and methanol	409–416
Farid, M.M.	Domestic electrical space heating with heat storage	83–92
Farthing, D.A.	Operational safety and post-maintenance gas leak detection in GE frame 9001FA gas turbines	465–474
Freeman, R.I.	Managing risk—achieving the balance for Magnox reactors	427–434
Gerolymos, G.A.	Multistage three-dimensional Navier–Stokes computation of off-design operation of a four-stage turbine	243–261
Gibson, G.P.	Managing risk—achieving the balance for Magnox reactors	427–434
Gilchrist, T.	Fuel cell bus operation at high altitude	57–68
Gilham, S.	Improving gas turbine power plant safety: the application of computational fluid dynamics to gas leaks	475–489
Gizzi, W.P.	Time-resolved measurements with fast-response probes and laser Doppler velocimetry at the impeller exit of a centrifugal compressor: a comparison of two measurement techniques	291–308
Gosselin, P.	Prediction of wall heat transfer for a gas turbine combustor	169–180
Grimaldi, C.N.	Performance analysis of a hydraulic air compressor	191–203
Gyarmathy, G.	Time-resolved measurements with fast-response probes and laser Dopper velocimetry at the impeller exit of a centrifugal compressor: a comparison of two measurement techniques	291–308
Gyarmathy, G.	Tip-clearance-affected flow fields in a turbine blade row	309–318
Hanisch, C.	Multistage three-dimensional Navier–Stokes computation of off-design operation of a four-stage turbine	243–261
